Introduction

In compliance with the basic objectives of the Cooperation Council for the Arab States of the Gulf, and in conformity with the objectives of the GCC Unified Economic Convention seeking to achieve economic integration among GCC member states, and aware of the crucial role played by GCC industries in the economies of the GCC member states, it becomes vital for the member states to take necessary measures against dumping, subsidy and increase of imports, which cause injury, threat of injury, or retardation to GCC industries.

Pursuant to Article 86 of the Rules of Implementation of the GCC Common Law on Antidumping, Countervailing Measures and Safeguard Measures which states, "The Technical Secretariat issues an Official Gazette where it publishes all publications required under this Common Law and its Rules of Implementation". Hereby, GCC-Bureau of Technical Secretariat for Anti Injurious Practices in International Trade pleased to publish the Notice Volume No (32) of the Official Gazette of GCC- Bureau of Technical Secretariat for Anti-Injurious Practices in International Trade.

The Secretariat General of the Cooperation Council for the Arab States of the Gulf (GCC)

GCC- Bureau of Technical Secretariat for Anti Injurious Practices in International Trade

The Imposition of Definitive Anti-Dumping Duties Against GCC Imports of Plates, Sheets, and Strip of Aluminum Alloys

(Originating in or Exported from The People's Republic of China)

In conformity with the GCC Common Law on Anti-Dumping, Countervailing and Safeguard Measures and its Rules of Implementation (Regulation), and upon the decision no. (31/AD7/2020) of the Permanent Committee of Anti Injurious practices in the International Trade (Permanent Committee), regarding accepting the complaint and approving the initiation of the investigation against GCC imports of Plates, Sheets, and Strip, of aluminium alloys, of a thickness not exceeding 8 mm but greater than 0.2mm - (*Product under investigation*) – from The People's Republic of China and based on the Permanent Committee's decision No. (37/AD7/2021) proposing the imposition of definitive anti-dumping duties against the GCC imports of the product under investigation from the concerned country to the provisions of Article (9) of the GCC common Law, and referring to the Ministerial Committee's approval on the Permanent Committee's decision No. (37/AD7/2021) pursuant to the provisions of Article (37) the Rules of Implementation, The GCC Bureau of Technical Secretariat for Anti-injurious Practices in International Trade (GCC-TSAIP) hereby announces the imposition of definitive anti-dumping duties against the GCC imports of the product under investigation originating in or exported from The People's Republic of China according to the following:

1. Product under investigation subject to the definitive duties

Plates, Sheets, and Strip, of aluminium alloys, of a thickness not exceeding 8 mm but greater than 0.2mm, except those polished, coated, heat treatable, and aluminium can stock used for beverage cans and its lids. The product under investigation is classified under the following GCC-Unified Tariff Code from items: (76061200, 76069200), originating in or exported from China.

2. Duration of the definitive duties:

The definitive antidumping duties shall enter into force for a period not exceeding 5 years starting from the date: 22 July 2021.

3. Form of the definitive duties:

The definitive anti-dumping duties shall take the form of *ad valorem* duties as percentages of the CIF value according to the following table:

| Country | Exporters/Producers names | Dumping margin as a percentage of the CIF value |
|--------------------------------|---------------------------|---|
| The People's Republic of China | All companies from China | 33% |

4. The reasons leading to the imposition of the definitive duties:

4.1 Determination of Dumping:

The investigation concluded that the imports of the product under investigation originating in or exported from the concerned country are being imported to the GCC market at dumped prices.

4.2 Determination of Material Injury and Causal link:

- There was a significant increase in the volume of dumped imports from China, either in absolute terms or relative to the consumption, and an increase in the market share of these dumped imports at the contrary of the market shares of the GCC industry, and other imports.

- It was found that there is a large impact of dumped imports from China on the selling prices of the GCC industry, as it was found that there is a price undercutting between the average selling price of the GCC product and the average selling price of the product under investigation.
- It was found that there is material injury represented by the decrease in the volume sales of the GCC industry and the market shares of the GCC industry, and the economic and financial indicators of the industry were negatively affected during the period of investigation.
- It was found that the factors other than dumped imports from China did not contribute to the material injury of the GCC industry.
- Therefore, it is definitively determined that there is sufficient evidence of the existence of the causal link between the increase in dumped imports from China of the product under investigation and the material injury to the GCC industry.
